SYSPRO Analytics

Objective

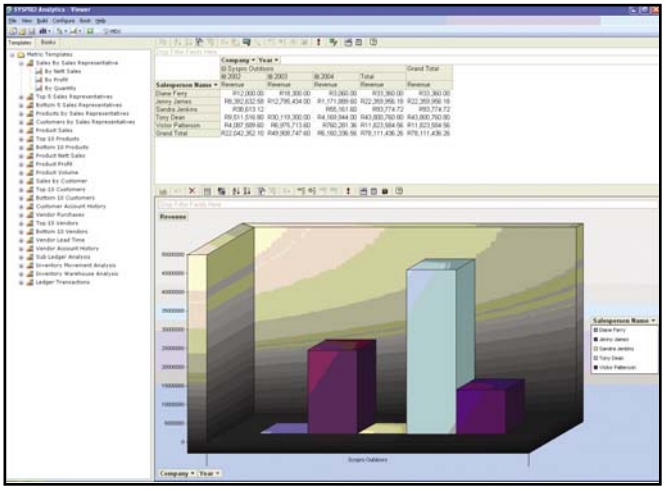
SYSPRO Analytics enables you to gain multidimensional insight into your organization enabling you to make accurate strategic management decisions.

The Value of SYSPRO Analytics

- Scaleable end to end solution
  - Template ETL Processes that can be customized
  - Front end viewer
  - Back end configuration
- Numerous Key Performance Indicators (KPI) provided with ability to define additional metrics
- Create own favorite views through Analytics books
- Ability to export views to Excel
- Quick and easy to install and configure
- Use Web Services for over the web analysis
- Information is gathered intuitively through a series of intelligent analysis objects and metric templates
- Removes the need to understand the database
- Removes the need to understand the intricacies of BI technology

Matching SYSPRO Analytics to your Business

- Access large amounts of historical data to allow 5 to 10 year trend analysis or simply compare this year to last
- Customize look, feel and content of graphs, grids and templates
- Data segmentation available for more detailed analysis of chart of accounts, product groupings and customer segments
- Fast access to complex queries across all business functions:
  - Analyze operational performance and monitor compliance
  - Manage sales performance and track trends in customer activity
  - Proactively measure product and reliability issues
  - Analyze procurement orders, supplier deliveries and charges
  - Monitor delivery and shipment trends and performance
- Ability to read non-SYSPRO related cubes allowing for current investment in OLAP not to be wasted.
- Uses Microsoft Business Intelligence standards
- Built upon .NET framework
- Use SYSPRO Analytics .NET assemblies to create own viewer or wizards
- Create business rules through Stored Procedures



Audit Trails and Reporting

SYSPRO Analytics enables a wide variety of information analysis;

- Ordinary data analysis – sales and marketing, project analysis
- Management reporting – balanced scorecard, dashboards
- Monitoring – exception reporting, alerts
- More sophisticated analysis tools – visualization and spatial analysis

Integration

- Core SYSPRO ERP data
- Non-SYSPRO OLAP cubes
- SYSPRO Business Object – exposing KPI and analysis functionality

Prerequisites - Server

- MS SQL Server 2000 with Service Pack 3
- MS Analysis Server with Service Pack 3

Prerequisites - Interactive Client

- MS Office XP or greater
- MS Office Web Components XP or greater

Prerequisites - Static Client

- MS Office Web Components XP or greater
