

Blanket Sales Orders & Releases

Objective

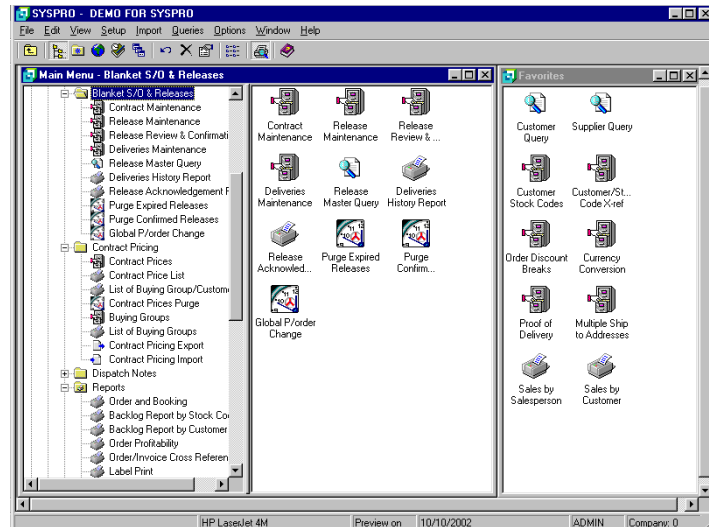

To provide facilities for setting up contracts between original equipment manufacturers and their customers by allowing blanket sales orders with multiple release dates, multiple call-off, and cumulative tracking.

The Value of SYSPRO Blanket Sales Orders & Releases

- Filters changes in orders quickly to schedule purchasing, manufacturing and dispatching in order to achieve the customer's release request
- Advises customers of the practicality of changes and communicates these changes to internal supplying departments
- Provides easy access to quantities delivered and outstanding per contract
- Gives detailed on-screen query providing access to Sales Order Lines, Customer Information and Release History
- Allows for reconciliation and inquiries according to individual quantities or cumes

Matching SYSPRO to Your Business

- Controls the parameters as well as the negotiated contractual arrangements
- Defines the number of days before ship date to allocate inventory to the orders
- Reviews and manipulates requests according to current capacity and prior to accepting the result
- Allows simple manual and/or EDI receipt of releases and call-offs
- Gives automated balancing and correction of opening balances
- Provides extensive visual decision-support comparisons with existing plans and contractual arrangements before the acceptance of changes
- New releases can be recorded either manually or through EDI
- Cross reference between customer's and supplier's stock codes
- In transit figure shown during confirmation phase
- Ability to record notes against a release during confirmation
- On-line release history query by month and year

Audit Trails and Reporting

- The Deliveries History report prints an audit trail of all invoices indicating whether they have been received
- The Release Acknowledgments report program lists all releases that have been confirmed

Integration

- Blanket Sales Orders & Releases provides automated integration with the SYSPRO Sales Orders & Invoicing, Inventory Control, and Requirements Planning (MRP) modules
- E-mail reports with the Office Automation module
- Blanket Sales Orders & Releases requires the Sales Orders & Invoicing and the Inventory Control modules
